

My social circle

Štěpán Vyhlídal

First circle

Into my first circle I put my closest family that means my mom, my dad and my older sister Monica.

I don't see my sister that much now because she is living on dormitory so she could be closer to her school. But when she is back we are having a good time.

Another person that belongs to my first circle is my best friend Monča.

We hang out almost every weekend (and it's so much fun).

We talk about things that happened to us over the week, drink coffee and sometimes gossip. She is just an amazing friend to have.

Last one that belongs here are my four cats Bobina (the oldest) and then her first kittens Očko, Emilia and Symetrik. They are just so cute but also so much hungry all the time. But I really love them.

Second circle

In my second social circle are my grandparents. I love my grandparents, when we visit them we have always a great time and they are always really helpful + my grandma makes the best tiramisu ever.

Then there are people from my drama club. I see them almost every Monday and its always a big fun. We play games and rehearse the performance (this year we are playing a play called Vlčí bouda). I really like it there.

Third circle

Into my third social circle I put my aunts, uncles and my cousins because I don't see them so much, but I really like them.

Then there are my classmates. I see them every week and sometimes its fun, but then there are times when I just don't want to see them anymore+ sometimes its like living in circus.

Fourth circle

In my fourth and last social circle are people that I meet like once or twice in a year.
Like people from summer camp or our family friends.
